The special edition of the 2011, sims 4.Former Federal Reserve Chairman Ben Bernanke has resigned as the managing director of the Boston Consulting Group, the firm said in a statement Monday. Bernanke, who served at the Fed from 2006 to 2014, was the youngest Fed chair in history, and has had a tumultuous legacy as chairman. The Fed slashed short-term interest rates to near zero during the financial crisis to stimulate the economy, and Bernanke left the Federal Open Market Committee under a cloud of criticism after maintaining that tapering was not in line with market expectations in 2012. "It has been an honor to have worked with the BCG and the Federal Reserve Board for these past eight years," Bernanke said in a statement Monday. "I have had the privilege of working with many outstanding people at the Board and BCG, and look forward to returning to academic life." Bernanke was first nominated to the Fed by President Barack Obama in 2008, and stepped down as chairman in early 2014. He has been chairman of the Brookings Institution since 2002, and he is also a professor of public policy and economics at Princeton University. His tenure at the Fed has also been scrutinized, especially over the rollback of the Fed's quantitative easing program. The BCG statement said the firm was "thrilled" to have Bernanke work with the firm "throughout his tenure." "Over the past year we have been discussing this with him, and have made the decision to release him from his noncompete," it said. Other than having similar job titles, Bernanke and Fed Chair Janet Yellen have little in common. For example, Yellen ended her term at the Fed in February, having held the post for four years, while Bernanke was nominated to the post eight years ago. Bernanke has been credited for steering the Fed through financial crisis while Yellen is seen by some as having been at the helm of the Fed during the crisis. Bernanke has also been a strong defender of the Fed, and Yellen has been a critic of the central bank. Yellen has called for an overhaul of the Fed's communications policy, and has also warned of the dangers of large monetary stimulus programs.// +build windows package
