The in vitro study of haemolytic activity of sheep red blood cells in moderate anaemia of various aetiology has revealed enhanced haemolytic reactions for regular sheep bloods as well as for cells from erythrocytoses of different pathogenetic origin. The effect is due to the decreased level of peripheral blood lymphocytes, the processes of erythropoiesis and the membrane stability.Q: Changing Font Family, What Style Are My Fonts Being Stored? I have some font styles defined in CSS, and I am using some Javascript to change them after the document is loaded. This works for all four (a, b, i, and s) and all of them use the exact same weight, style, and font face. The Javascript looks like this: if (context.style.backgroundColor == '#1a77ae') { context.style.backgroundColor = '#4c1e9a'; context.style.fontFamily = 'georgia'; } if (context.style.color == '#ffffff') { context.style.color = '#ffffff'; context.style.fontFamily = 'arial'; } if (context.style.fontWeight == '200') { context.style.fontWeight = '700'; context.style.fontFamily = 'arial'; } if (context.style.fontSize == '24px') { context.style.fontSize = '60px'; context.style.fontFamily = 'georgia'; } But when I load the document, the only font I
